

ADAM WAYNE THOMAS

Baytown, TX • 316-648-6342 • adam.thomas9891@gmail.com

IT Systems Administrator • 14 Years Experience • 71 WPM • ISC2 CC • SOC Bootcamp In Progress

PROFESSIONAL SUMMARY

Enterprise IT professional with 14 years of experience in systems administration, Tier 2/3 technical support, Active Directory, Microsoft 365, Windows Server, endpoint management, networking, and PowerShell scripting. Proven track record supporting multi-site environments, managing user lifecycles, administering hybrid identity infrastructure, and delivering reliable IT operations. Experienced with ConnectWise, DameWare, RDP, SQL Server, and C# application development. Holds ISC2 Certified in Cybersecurity (CC) and is actively completing a SOC Analyst bootcamp. Open to full-time, contract, and contract-to-hire opportunities in the Houston metro and remote roles nationwide.

TECHNICAL SKILLS

Operating Systems: Windows 10, Windows 11, Windows Server 2012/2016/2019/2022, Virtual Desktop Infrastructure (VDI)

Identity & Directory Services: Active Directory (AD DS), Group Policy (GPO), Entra ID (Azure AD), AAD Connect, RBAC, MFA, LDAP

Cloud & Productivity: Microsoft 365, Exchange Online, SharePoint, Teams, OneDrive, Google Workspace, Google Admin Console

Networking: TCP/IP, DNS, DHCP, VPN, Wi-Fi, Routing & Switching, Network Troubleshooting, Firewall Basics

Remote Access & RMM: ConnectWise, DameWare, RDP, Remote Monitoring & Management, Endpoint Remote Support

Security: Endpoint Protection, MFA, Access Auditing, Security Groups, ISC2 CC, SOC Analyst Bootcamp (In Progress)

Scripting & Development: PowerShell, Command Line/CLI, C#, Windows Forms, SQL Server, Visual Studio, AI-Assisted Scripting

ITSM & Asset Management: Ticketing Systems, Incident Management, SLA Adherence, IT Asset Lifecycle, Inventory Tracking, Documentation

Virtualization: Hyper-V, VMware ESXi, Virtual Desktop Environments

Tools & Platforms: ChatGPT, Claude, Microsoft Copilot, Gemini, Microsoft Intune (MDM Concepts), SysAid, Kaseya (Familiar)

PROFESSIONAL EXPERIENCE

IT Systems Administrator — USD 465 — Unified School District | Winfield, KS *Feb 2012 – Present*

Member of a 5-person IT team supporting a multi-site K–12 environment of 500+ users across desktops, laptops, servers, mobile devices, printers, and business applications. Served as Tier 2/3 escalation resource for complex issues across Windows, networking, identity management, and data systems while contributing to infrastructure administration, endpoint security, and internal tool development.

Systems Administration & Infrastructure

- Administered Windows Server environments including Active Directory, DNS, DHCP, Group Policy, file shares, print services, patch management, and application support across multiple sites.
- Managed hybrid identity infrastructure across Active Directory, Entra ID (Azure AD), and Google Workspace for 500+ user accounts including provisioning, deprovisioning, and access control.
- Supported Hyper-V virtualized server environments including VM management, troubleshooting, and maintenance.
- Configured and maintained VPN connectivity, network troubleshooting, and switch/router coordination across multi-site infrastructure.
- Assisted with endpoint imaging, Windows update deployment, security patch management, and device lifecycle across desktops, laptops, and Chromebooks.

Tier 2/3 Support & Remote Access

- Delivered Tier 2/3 escalation support for hardware, software, application, printer, and network issues for 500+ staff and students across multiple buildings.

- Provided remote support using ConnectWise, DameWare, and RDP to diagnose and resolve endpoint issues without requiring physical presence.
- Managed incidents and service requests through centralized ticketing system, maintaining SLA compliance and accurate documentation on all tickets.
- Supported Microsoft 365 including Exchange Online, Outlook, Teams, SharePoint, OneDrive, and licensing administration.
- Supported mobile devices including iOS and Android smartphones and tablets for staff across the organization.

Scripting, Automation & Development

- Wrote PowerShell scripts to automate Active Directory account management, bulk operations, reporting, and administrative workflows.
- Developed a full custom internal application in C#, Windows Forms, and SQL Server for repair ticket management, asset tracking, and inventory reporting.
- Used AI tools including ChatGPT and Claude daily for scripting assistance, documentation, and workflow automation with working knowledge of Microsoft Copilot and Gemini.

Security, Documentation & Collaboration

- Maintained role-based access controls, security group structures, MFA enforcement, and least-privilege principles across AD, M365, and file shares.
- Authored technical documentation, knowledge base articles, user-facing guides, and SOPs to standardize IT support across the organization.
- Coordinated with third-party vendors for application support, licensing, integration troubleshooting, and hardware maintenance.
- Participated in technology planning, software evaluation, system migrations, and process improvement initiatives.
- Trained staff and end users on applications, security best practices, and technology workflows across multiple departments.

NOTABLE PROJECTS

Custom IT Ticketing & Asset Management System — C#, SQL Server, Windows Forms, Visual Studio

Designed and built a full internal application from scratch to replace manual repair tracking. Included ticket creation and status tracking, asset records, repair notes, parts and labor charges, image uploads, inventory management, and administrative reporting dashboards. Eliminated manual tracking, improved device accountability, and gave leadership real-time visibility into repair costs and turnaround time.

PowerShell Automation & AI-Assisted Scripting — PowerShell, Active Directory, ChatGPT, Claude

Developed and maintained PowerShell scripts for Active Directory user management, bulk operations, access reporting, and administrative automation. Integrated AI tools (ChatGPT, Claude) into daily scripting workflows to accelerate development, troubleshoot logic, and generate documentation — reducing manual overhead across routine IT operations.

Enterprise Identity & Access Management — Active Directory, Entra ID, Microsoft 365, Google Workspace

Administered and standardized identity management across Active Directory, Entra ID, Microsoft 365, and Google Workspace for 500+ users. Designed security group structures, documented onboarding/offboarding procedures, enforced RBAC policies, and maintained audit-ready access records across all platforms.

CERTIFICATIONS & TRAINING

- **Certified in Cybersecurity (CC)** — ISC2
- **SOC Analyst Bootcamp** — Think Cloudly • In Progress

EDUCATION

Bachelor of Science — Southwestern College, Winfield, KS

2010 – 2014
